

**Tozour Energy Systems Earns Prestigious STAR Qualification
from Mechanical Service Contractors of America**

KING OF PRUSSIA, Pa. (August 3, 2009) — Tozour Energy Systems, Inc. a full-service HVAC and building automation provider, announced today the company has been awarded STAR qualification status from the Mechanical Service Contractors of America (MSCA). Tozour received this designation after surpassing stringent business and HVAC service standards set forth by MSCA.

Contractors that achieve MSCA STAR qualified status belong to an elite group of service providers. These contractors have verified that they uphold a strict code of business ethics, employ the best trained and most qualified workforce, maintain a safety record above the industry average, offer outstanding customer service and focus on continuing education and training for all employees. A third-party review committee set up through the National Inspection, Testing and Certification Corporation (NITC), determines qualification based on documented proof of criteria submitted by contractors. When the health, safety and comfort of building occupants are on the line, it's vital to hire a highly competent MSCA STAR contractor.

"Our Trane factory authorized technicians went above and beyond and made it their personal responsibility to become UA STAR certified," said Kevin Duffy, COO of Tozour Energy Systems. "Moving forward, we will only be selecting technicians who are UA STAR certified, because we believe in the rigorous testing and high standards set forth by the association."

About Mechanical Service Contractors of America (MSCA) STAR

Initiating a new standard of excellence for the mechanical service contracting industry, MSCA has raised the bar for training and professionalism with their new MSCA STAR qualification program. The association initiative of excellence offers proof to building owners and facilities managers that the STAR qualified contractor is providing the highest level of skill, quality, value, and professionalism in the industry.
